

17 March 2020

Dear Parent or Guardian,

For the following weeks, our class will be using Google Classroom for a number of digital assignments. Google Classroom can be accessed with a Gmail account you or your child may already have or will create. Your child can access the classroom from home by logging in from a web browser such as Safari on the school iPad or any other personal devices with internet access and joining my class. To join please go to: classroom.google.com and use the class codes provided.

In addition to learning and practicing important content with Google Classroom assignments, your child will also be developing important computer skills. I look forward to using this learning tool with students throughout the rest of the school year. Please contact me if you have any questions.

Sincerely,

Salve Banzon
